

area

Bruges is the number one destination for tourists in Belgium. Coach loads descend on the city to experience the historical architecture, canal rides and speciality beers. At first sight it seems an unlikely spot for good footwear retail, but amongst the cafes and Belgian chocolate shops are a number of outstanding shoe stores. Quicke is renowned for international designer labels, Giraldo is good for sports and stocks the most extensive range of Fly we have found. Topolino is an excellent source of trendy European children's footwear.

getting around

Bruges is very small and can easily be covered by foot in a couple of hours. If travelling by car it is best to use one of the central car parks as parking on the street is difficult.
